

# Helicobacter pylori

– bakterien som orsakar magsår

**Infektion**  
*Helicobacter pylori* infekterar magsäckens nedre del.

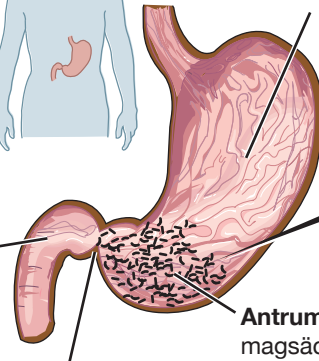

**Corpus**  
magsäckens övre del

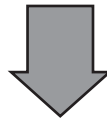

*Helicobacter pylori*

**Duodenum**  
tolvångertarmen

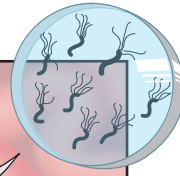

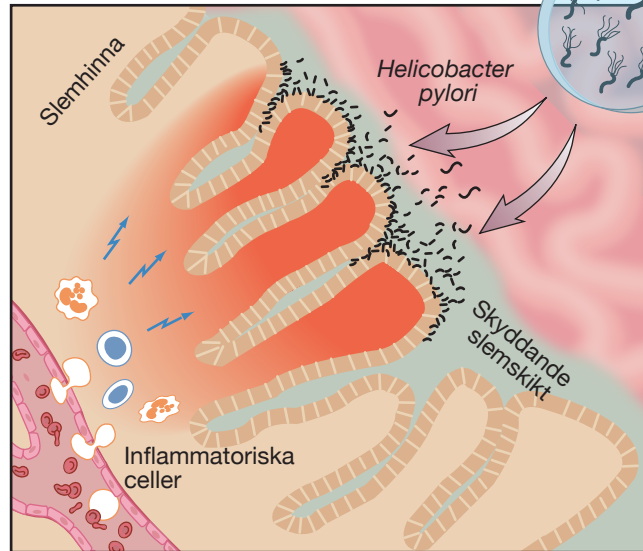

**Antrum**  
magsäckens nedre del

**Pylorus**  
nedre magmunnen

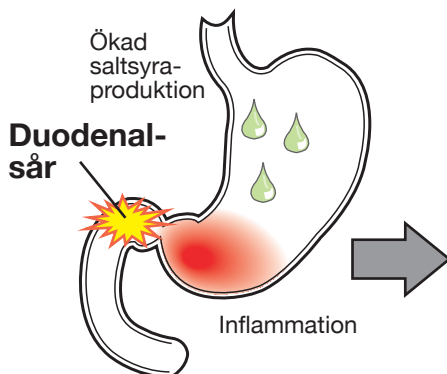

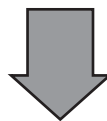

**Inflammation**  
Infektion med *Helicobacter pylori* i magsäcken orsakar en inflammation i slemhinnan (gastrit). Denna ger oftast inga symtom.

## Sår

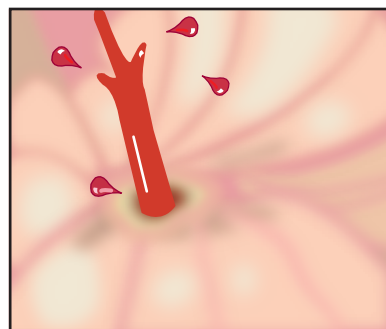

Inflammationen kan leda till sår i tolvångertarmen (= duodenalsår) eller sår i magsäcken (= ventrikelsår). Allvarliga komplikationer är blödande magsår och brutet magsår.

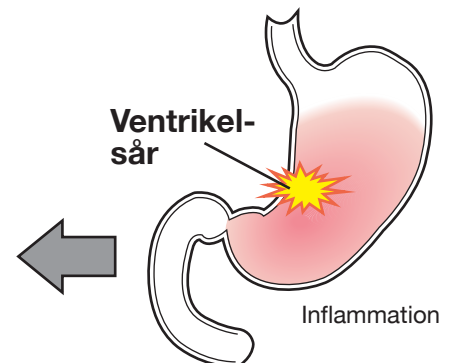

**Duodenal-sår**

Ökad saltsyra-produktion

Inflammation

**Blödande magsår**

**Ventrikel-sår**
